

Water Safety at the Beach

We all look forward to visiting the seaside - often lifeguards are on duty on the beach. They put out different flags so that visitors and swimmers know where it is safe to swim. Colour the boxes below to show:

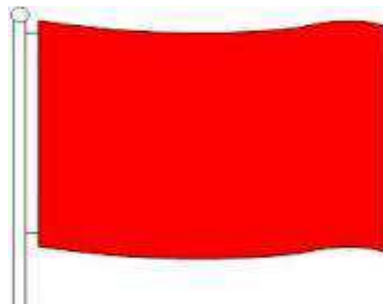

- 1 the area of the beach where it is safe to swim

- 2 The area of the beach reserved for surf boards

- 3 When this flag is flying you must not swim.

- 4 If you see a windsock on the beach you must not take any blow-up boats or animals into the sea. It is too windy!
